

# WATERPROOF PLATFORM SCALES

release date 30-04-2010

Waterproof platform scales are designed to operate in humid conditions and direct contact with water.

They feature LCD display, stainless steel weighing pan. All scale components are made of stainless steel OH18N9. The indicator series PUE C/31H is installed on a pillar with possibility of changing the angle (optionally, the head can be installed on a 3 meter-long cable with possibility of hanging it on a wall). Range of capacities for these scales vary from 3 kg/1 g to 300 kg/100 g.

WPT/H scales are powered from mains, RS 232 as standard. On special request, waterproof platform scales can be manufactured with upgraded antirust coating.

-  Counting pieces
-  Checkweighing
-  Summing function

Waterproof scales feature 100 % waterproof protection of the load cell. Such design protects the load cells against the influence of ambient factors.
