

HOLDER FOR INDICATOR IN PLASTIC CASING

release date 30-12-2010

The holder is used for mounting the indicator series PUE C31 on wall.

Simple mounting solution enables holder installation on any horizontal and vertical surface.

The base of the holder enables changing the angle of indicator installation in wide range, according to user requirements.

The holder is manufactured in mild steel technology. Adjusting holder's angle is carried out with large handwheel made from plastic.
