Innovation and technical advancement

MISSION

Our mission is sales of our technologically advanced ideas.

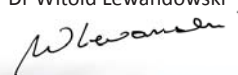

RADWAG realizes a concept of a company which targets two separate notions, manufacturing process and sales of its products. Such approach requires extraordinary organization of production process and proper management of sales structures. Direct contact with customers results in quick and professional reaction to market requirements and expectations.

RADWAG intention is to provide customers with complete technical support they need while exploitation of RADWAG instruments. This is guaranteed by our technical support department, which aim is to find solutions to customers inquiries.

RADWAG continuously structures its image as an innovative and reliable manufacturer of professional and technically advanced products. It is a member of Polish Chamber of Commerce for High Technology.

RADWAG allocates a lot of profits from sales into research and development, and systematically introduces into the market its new ideas and own technologies.

Managing Director RADWAG Balances & Scales
Dr Witold Lewandowski

QUALITY

RADWAG has implemented quality management system ISO 9001:2000 and it is authorized to issue EC declarations of conformity for manufactured goods.

Each production stage is monitored and recorded, and specially designed computer system supervises each production phase. A single product obtains a production report which contains all control parameters, and product individual characteristics. Product data is also saved in the company internal computer data base for future reference.

RADWAG is in cooperation with multiple European and worldwide Notified Bodies. The effect is a list of certificates for our balances and scales. The certificates are confirmation of RADWAG high quality products and their compatibility with norms and regulations in each of the countries. Until 2010 RADWAG has obtained over 50 certificates issued in Europe, Asia, North and South America, Africa and Australia.

SALES NETWORK

RADWAG is the leading European manufacturer of balances and scales. Our sales network covers nine trade offices in Poland, three in Europe, one in North America and two in Asia.

Apart from trade offices, RADWAG distributes its products to over a hundred exclusive distributors located all over the world. Our sales network is constantly expanding to new markets. Since the beginning of 2010, there have been over a hundred of RADWAG official distributors, and this sales network continuously develops.

In order to sustain the development pace and popularize our products in the worldwide market, RADWAG actively participates in most important branch fairs and exhibitions, like: Pittcon (USA), Achema (Germany), ArabLab (UAE), Interweighing (China), Eurolab (Poland) and many more.

Application of RADWAG products

LABORATORY

RADWAG balances are applied in laboratories of chemical, pharmaceutical and food processing industry, petrochemical plants and in other laboratories existing in universities, health care and wildlife conservation institutions.

Due to high readability, accuracy and reliability, RADWAG balances gain even greater positive response from the customers in Europe, as well as in Asia or America, Africa and Australia. The new series of "2Y" balances, places RADWAG among the most reliable manufacturers of technologically advanced products.

INDUSTRY

RADWAG manufactures a broad range of scales and solutions for multiple industrial branches. The vast majority of products are purchased by agricultural, meat and fish processing plants, for which RADWAG has designed a line of stainless steel scales with highest accessible IP rating.

RADWAG scales are also applicable in trade, transport and logistics. Technologically advanced products, like checkweighers are designed for installation in technological lines, and modern weighing terminals function as fully functional industrial computers, which are used for construction of random network solutions and multi-stand weighing systems.
